As an artificial intelligence language model, I have been trained on a vast amount of text data which includes various types of documents, articles, and books. However, I don't have the capability to access the internet or any specific website. As a result, I'm unable to provide any information about the specific website you're referring to or a direct link to it. Additionally, I can't browse the web or follow links. If you have a specific question or topic you'd like to know more about, feel free to ask, and I'll do my best to provide a helpful response based on my training data.
Art and Agency - Alfred Gell 1998-07-09

Alfred Gell puts forward a new anthropological theory of visual art, seen as a form of instrumental action, the making of things as a means of influencing the thoughts and actions of others. He suggests that existing anthropological and aesthetic theories too often focus on patterns and styles rather than on the social context in which art exists. Gell's theory of art is thus anthropological in the sense of situating the act of making things within a social context.

Art and Agency was completed just before Alfred Gell's death at the age of 51 in January 1997. It embodies the intellectual bravura, lively wit, vigour, and erudition for which he was admired, and will stand as an enduring testament to one of the most gifted anthropologists of his generation.

Surfaces and Essences - Douglas Hofstadter 2013-04-23

Shows how analogy-making pervades human thought at all levels, influencing the choice of words and phrases in speech, providing guidance in unfamiliar situations, and giving rise to great acts of imagination.

Analysis of Boolean Functions - Ryan O'Donnell 2014-06-05

This graduate-level text gives a thorough overview of the analysis of Boolean functions, beginning with the most basic definitions and proceeding to advanced topics.
